

System-Level Efficiency Gains of Superconducting Distribution for AI Clusters

A Comparative Power Analysis

HTS-unlocked value layers with direct impact on economic performance

Tokamak Energy Tokamak Energy is a UK-based fusion and high temperature superconducting (HTS) technology company with end-to-end capability from HTS design to manufacturing. Through our TE Magnetics division, we develop advanced HTS magnet and power-distribution systems for fusion and for wider applications, including power systems, analytical science, magnetic propulsion, and next-generation motors and generators. www.tokamakenergy.com

+BE is a UK energy-to-compute infrastructure company delivering modular, AI-ready data centres and power systems for high-density, energy-intensive workloads. It provides end-to-end design, power integration, and delivery services, leveraging advanced power technologies and clean energy solutions to optimize performance, efficiency, and scalability across the UK, North America, and select international markets. www.bec.uk
