Open. Together.

OCP SUMMIT

Telco Project Welcome and Status

Sumithra Bhojan, AT&T
Craig White, Nokia
Telco project co-leads

TELCO

Open. Together.

What is the Open Compute Project?

Open – design specifications are discussed openly

- Mail lists are open to anyone

- Input is welcomed from anyone

- Project output is shared with anyone

Compute Project

- Projects related to Computing

- Datacenters, Servers, Racks & Power, Networking and more

TELCO

OCP SUMMIT

Open. Together.

What is the Telco Project?

A group that discusses and creates OCP specifications related to Telco use cases. Includes:

- Adopters
- Solution Providers
- Equipment Manufactures
- Component Providers

Open. Together.

The technical sessions are actual working sessions of the projects. These sessions are deeper, more focused discussions about Telco topics.

TELCO

Adopters will be presenting needs for new products.

Manufactures will report on products meeting existing specifications.

Solutions will be presented about several software solutions.

Open. Together.

Some recent work of Telco Project

- New Subproject – OpenEdge, Including it's first submission, OpenEdge Chassis from Nokia

- Cell Site Gateway Router – Product submission from Edgecore meeting an AT&T Spec

- Open GPON-OLT specification from Deutsche Telekom

- AT&T Open Fiber Distribution Hub Specification

- And others

TELCO

Open. Together.

Ongoing work - Draft Specification

TELCO

- Cell Site Gateway Router – Product submission from Ufi Space meeting an AT&T Spec

- AT&T Open Programmable PON OLT Spec

- Edgecore AS7926-40/80X Aggregation Router Spec

- AT&T G.fast DPU Specification
