Integrated Solutions

OCP Integrated Solutions enable companies to adopt proven solution stacks running on OCP Accepted™ and OCP Inspired™ hardware, thereby providing a converged infrastructure solutions for the Enterprise.

These managed offerings showcase a combination of software products, supporting different rack form factors. All OCP integrated solutions have proven support offerings including 3rd party product support to ensure efficient, reliable and scalable workload deployments.

CTC Open Cloud Package

Open Cloud Package is a fully integrated rack of OCP recognized hardware combined with validated software providing Enterprises an efficient and scalable way to manage their infrastructure as software.

This integrated solution comes with an Open Source system management toolset to manage physical and virtual infrastructure and is ideal for Cloud native, Object storage and container enterprise workloads.

Circular Economy

The Circular Economy is an economic approach to sustainability which minimizes waste and makes the most of IT assets. This approach focuses on developing products so they can be reused and repurposed with no residual waste.

As the amount of hardware used in data centers continues to grow, OCP is committed to looking at ways to help reduce waste and embodied energy across all areas of the data center infrastructure.

OCP members have led this effort by creating integrated software solutions based on 2nd user OCP hardware, which enables enterprise companies and public sector organizations to quickly evaluate, adopt and scale their infrastructure using proven hardware.

All integrated solutions on this page are based on a Circular Economy approach and supported by our OCP Members.
