

2027 OCP EMEA SUMMIT

April 6 - 8 at Congress Center Hamburg, Hamburg, Germany

The **OCP EMEA Summit** serves as a platform where global technical leaders come together to tackle the issues related to data center sustainability, energy efficiency and heat reuse in the region. The focus is on exploring how innovations from hyperscale data center operators can contribute to solving these challenges. The **OCP EMEA Summit** also highlights deployments of specific OCP-recognized data center equipment in the EMEA region.

The key areas of emphasis for 2027 will be Data Center Sustainability, AI, Security & Data Protection, Power & Cooling and Deployments. Additionally, invited talks will dive into topics such as quantum technology, optics and telecommunications. Participants will move forward the OCP Community's role in developing and implementing a sustainable and scalable computational infrastructure for the future in Europe.
