OPEN POSSIBILITIES.

Heterogeneous Integration at Microchip

- Today Microchip ships MCM devices in production.
- Advanced packaging technologies provide clear benefits of cost, density, power and flexibility.
- Microchip is looking forward to incorporate newer Advanced Packaging technologies as they become commercially available
- Microchip is actively participating to help drive of open-source standards and other collateral at the OCP-ODSA
- Call to Action: Come see the ODSA-Business working group present a paper titled “*Cost Modelling Analysis for Heterogeneous Integration of Chiplets*” –
 - November 10th @ 8.35am– in collaboration with Google and ARM

OPEN POSSIBILITIES.

Thank you!
