

Welcome to FNTECH!

Company Profile

- FNTECH was founded in 1998 in Huntington Beach, California.
- Over the past 20+ years, we've successfully partnered with top-tier companies. We offer in house creative, production and event management teams for our clients.
- We've worked on events of all sizes, types and budgets, both domestically and abroad. In-person, virtual, and everything in-between.
- We have two large headquarters – one in South San Francisco and another in Southern California, which includes a virtual reality lab, 3D printing hub, and robust wood/metal fabrication shop.

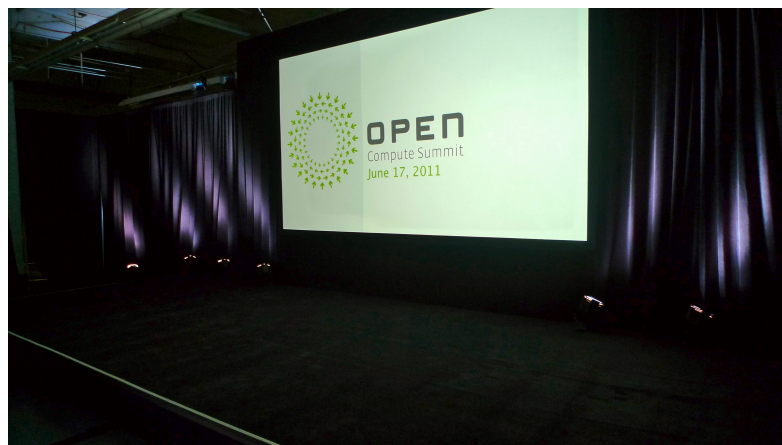

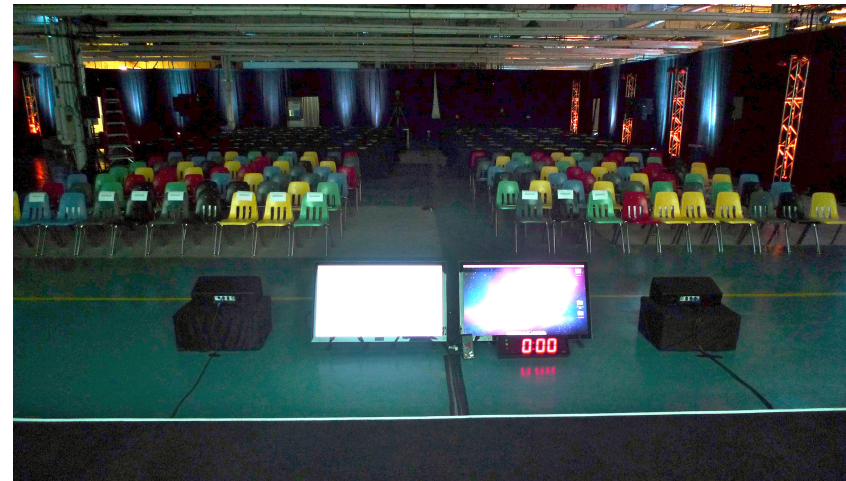

OCP Production Partner

OCP Summits 2011-Current

We have been honored to be the production partner for OCP for almost a decade!

FNTECH business model change...

Former FNTECH Product Mix

In-person event support based on our three pillars:

production | event management | creative design

FNTECH Product Mix Today and Tomorrow

In-person Event Support +

NEW OFFERING

A

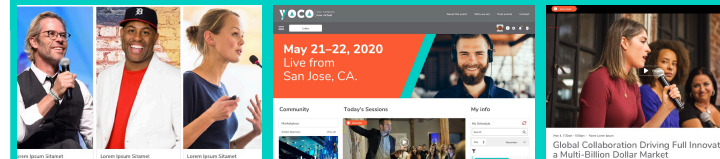

- Live presentations
- Video streaming
- Video on demand

NEW OFFERING

B

- Virtual events
- Hybrid events (live + virtual)

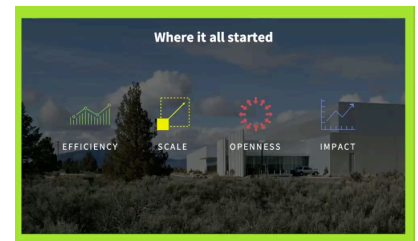

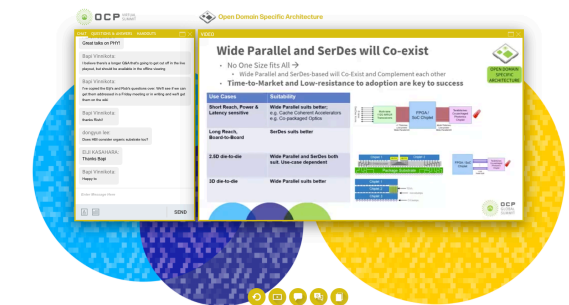

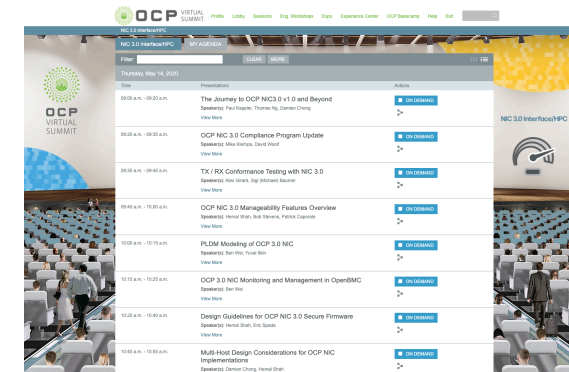

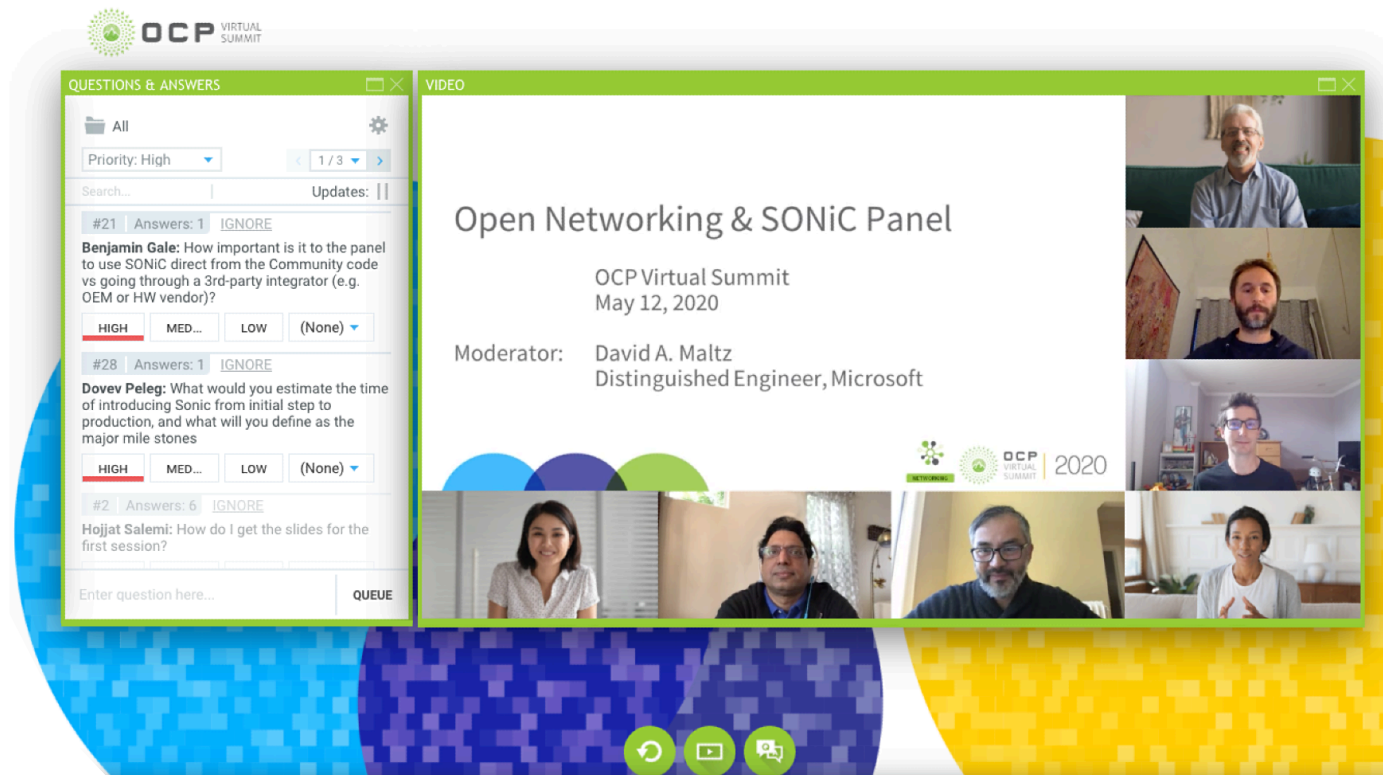

Session Designs

CASE STUDY: OCP Virtual Summit | FNstudios + Intrado

This event morphed from an in-person Summit to a virtual event in less than 60 days. The client chose an illustrated 3D approach – an intentionally pixelated version of their in-person design to visually indicate they had “gone virtual.” Event included 4 days of keynote sessions, 250+ breakout sessions, 14 color-coded tracks, and 350+ presenters from around the globe.

FNvirtual Studio

Volumetric, Green Screen and Remote VC Studios | FNTECH Production

Different studio options available for everything from remote speakers joining via VC software or in-person studios with green screen, volumetric and Unreal Engine integration with motion backgrounds and camera tracking!

Session Designs

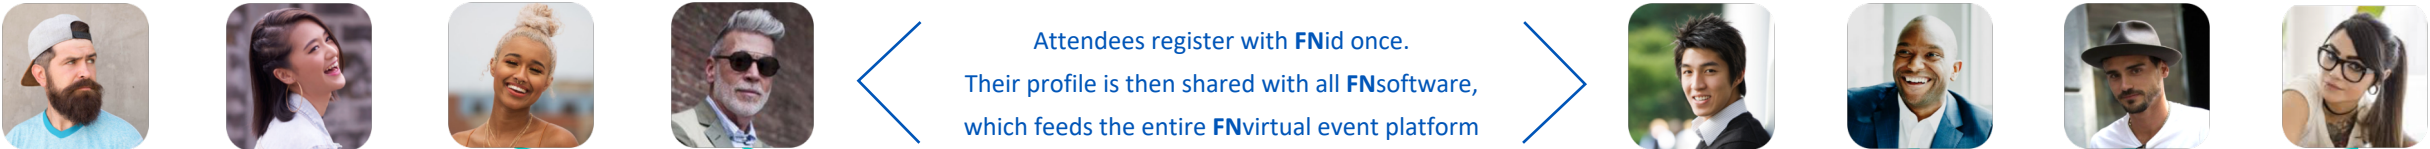

Virtual Backgrounds, Consoles & Overlays | FNTECH Creative

Graphic designs to fit your brand.

Existing FNsoftware

FNid

FNvirtual A visually rich and engaging virtual event platform that connects people.

FNvirtual Interface

Unique Look and Feel | FNTECH Creative

A custom-built event environment that focuses on meeting the unique needs of our clients. FNsoftware and API integration with any existing tool. Sessions with multiple speakers and sources. Expo Hall with unlimited sponsorship levels. Threaded chats. Personalized content. Community promotions and advertising. Reminder notifications, gamification, and more!

Tue 10, 8:20am - 9:05am - OCP TECH WEEK Virtual Venue - Main - NIC/Mezz
A Taller OCP NIC – Background, Progress, & Potential

By David Herring, Jon Lewis, Yin Hang, Jonathan Cohn - NIC/MEZZ

David Herring
Technologist

Jon Lewis
Distinguished Engineer

OCP NIC 3.0 form factor has gained significant momentum since its introduction in 2017. The industry has a strong hunger for bandwidth fueled by unprecedented data growth and machine-to-machine communication. The arrival of next generation PCIe interface, namely PCIe Gen 5, the bandwidth doubling of PCIe Gen 4, has been a long time coming. For the first time, PCIe x16 Gen 5 has enough bandwidth to support 400Gb/s. On the other hand, QSFP is capped at 200Gb/s per connector. We foresee this limitation early this year.

Thank you for your time and attention.
