FALL VIRTUAL EVENT

# (RE)DESIGNING COLLABORATION

---

October 6, 2020 @ 9am PST

# OCP Future Technologies Symposium

... is an Open Compute Project Foundation (OCP) initiative that brings together people from **academia, industry, startups, venture** and **analyst firms** to solve together future problems facing the industry and accelerate productization through partnerships and open source R&D.

October 6, 2020 | (Re)Designing Collaboration

# Long-Term Framework

## **Engagements: Deepen partnerships between Industry & Academia / Startups**

OCP community should start to influence curriculum, establish recruiting pipelines, organize topical / regional events to get talent and ideas flowing for unique Data Center challenges

## **Research: Accelerate productization through open source R&D**

Cross-cutting partnerships across academia and Industry focused on future problems / technologies facing OCP community. Symposium can be venue to formally organize joint R&D, funding, and knowledge sharing partnerships

## **Events: Host regular events to build community**

Participation at OCP Summits (Global and Regional), evolving into inclusion in Project-specific engineering workshops, meetups, plugfests/hackfests, etc.

## **Community: Mature communities in between events**

Local and/or Topical (online + real-world) communities between Industry and Academia / startups

# Join our group
